

## Preface

This is Part 3 of the “Special Issue Dedicated to Ivo G. Rosenberg.”

Part 1 and Part 2 appeared in Vol. 36, No. 4–5 (2021) and Vol. 38, No. 1–2 (2022), respectively, of the *Journal of Multiple-Valued Logic and Soft Computing*. The contents of all three parts are listed at the end of this Preface.

Ivo George Rosenberg  
1934 – 2018

Ivo Rosenberg was born on December 13, 1934, in Brno, Czechoslovakia (now, the Czech Republic) and passed away on January 18, 2018, in Brossard, Canada.

Throughout his life, Ivo Rosenberg was a highly active and productive mathematician. He published over 230 papers with more than 60 co-authors.

His research interests ranged over multiple-valued logic, general algebra and discrete mathematics. Clone theory was the center of his interests, and he used relations as a key tool in his investigations. He characterized the maximal clones on finite sets via relations, and he studied the rigidity problem described by relations.

The photo on the previous page shows Ivo Rosenberg in his early days. This photo was taken in 1970 when he was a professor at the University of Saskatchewan (1968–1971). The year of 1970 was a memorable year for him and for us as his best-known paper – the complete description of all maximal clones on finite sets – was published with a full proof in this year. This is a monumental work that has had great impact on clone theory as well as multiple-valued logic and algebra in general. (See the paper on Ivo Rosenberg's work included in this volume.) In 1971, Ivo Rosenberg moved to the Université de Montréal and worked there as a full professor (1971–2011).

Nature was Ivo's friend. He liked to take a walk in the woods on hills and mountains. The above photo was taken around 2005 in his cottage in Magog, Québec. The cottage is surrounded by full of nature with beautiful scenery. For many years Ivo enjoyed his life at this cottage with all his family: his wife Loty, his daughter Misha, his son Marc, and his grandchildren.

I (H.M.) also have a personal pleasant memory about this cottage. In the autumn of 1998, Ivo and I had a discussion on some mathematical problem during our stay at the cottage. It was the time when the leaves of the trees around us were changing their color beautifully. In the daytime we walked

and talked on a hill and a small mountain near the cottage, and at night we concentrated on our problem. Our discussion resulted in the paper entitled ‘Gigantic pairs of minimal clones’.

Part 3 of the Special Issue contains four contributed research papers. They are followed by a paper honoring Ivo Rosenberg’s work, which presents some of his most influential results and their impact on logic, algebra and computer science. Part 3 concludes with a complete list of Ivo Rosenberg’s publications.

We are grateful to all authors who joined us in honoring the memory of Ivo Rosenberg by submitting their work to the Special Issue. Some of the papers could not be included in this issue. Nevertheless, our thanks go to those authors as well.

The publication of Part 3 was significantly delayed. We apologize for the delay. Particularly, our deep apology goes to the authors of the contributed papers of Part 3, who kindly had patience waiting for the publication of their papers for several years.

As a friend and a colleague, Ivo was a man of kindness and friendship. He had extremely warm and humble mind, which was recognized and appreciated by all who knew him. We express the deepest respect and gratitude to him.

Six years have already gone by since Ivo Rosenberg passed away. However, the academic influence of his work lives on.

With our heartfelt gratitude, we dedicate this special issue to this great mathematician.

Ágnes Szendrei

## Contents of Parts 1, 2, 3 of “Special Issue Dedicated to Ivo G. Rosenberg”

### **Part 1** MVLSC Vol. 36, No. 4-5 (2021)

Preface	271
Doubling Tolerances and Coalition Lattices Gábor Czédli	275
The Structure of the Maximal Congruence Lattices of Algebras on a Finite Set Danica Jakubíková-Studenovská, Reinhard Pöschel and Sándor Radeleczki	299
Ordered Relations, Concept Lattices and Self-bonds Kalle Kaarli and Sándor Radeleczki	321
Deciding the Existence of QuasiWeak Near Unanimity Terms in Finite Algebras Alexandr Kazda	337
The Poset of Copies for Automorphism Groups of Countable Relational Structures Claude Laflamme, Maurice Pouzet, Norbert Sauer and Robert Woodrow	353
Self-commuting Operations Hajime Machida and Péter P. Pálfy	383
Clones of Compatible Operations on Rings $\mathbb{Z}_{p^k}$ Miroslav Ploščica and Ivana Varga	391
On Centralizers of Finite Lattices and Semilattices Endre Tóth and Tamás Waldhauser	405
Pierce Stalks in Preprimal Varieties D. Vaggione and W. J. Zuluaga Botero	437
Strong Subalgebras and the Constraint Satisfaction Problem Dmitriy Zhuk	455

### **Part 2** MVLSC Vol. 38, No. 1-2 (2022)

Preface	1
On Some Intervals of Partial Clones Valeriy B. Alekseev	3
All Centralising Monoids with Majority Witnesses on a Four-element Set Mike Behrisch	23
Inexact Residuation in Effect Algebras Ivan Chajda and Helmut Länger	57

Modal Hilbert Algebras and their Triple Representation Jānis Círulis	81
A Survey on the Fine-grained Complexity of Constraint Satisfaction Problems Based on Partial Polymorphisms Miguel Couceiro, Lucien Haddad and Victor Lagerkvist	115
Boole-De Morgan Bilattices Yu. M. Movsisyan	137
Towards the Classification of Polymorphism-homogeneous Metric Spaces Bojana Pantić and Maja Pech	153
On Planarity of Join-between Lattices Marijana Gorjanac Ranitović and Andreja Tepavčević	183
Languages with Finite String of Quantifiers on Uncountable Structures Boris A. Romov	197
On Completions of Posets with Operators Xia Zhang, Jan Paseka and Wen Ma	227

### **Part 3 MVLSC Vol. 44, No. 5-6 (2025)**

Preface	421
Piggybacking over unbounded distributive lattices Leonardo M. Cabrer and Hilary A. Priestley	427
Closure algebras of depth two with extremal relations: Their frames, logics, and structural completeness Ivo Düntsch and Wojciech Dzik	451
Characterizing polynomial arithmetic with stochastic circuits Patrick Holec, Weikang Qian, Marc Riedel and Ivo Rosenberg	483
Ultralocally closed clones Keith A. Kearnes and Ágnes Szendrei	509
Ivo G. Rosenberg's work on maximal clones and minimal clones Ágnes Szendrei	539
List of publications of Ivo Rosenberg	601
